These purpose built bollards are used as a deterrent to thieves and to generally stop vehicle access into restricted areas when required. They can be core-drilled into existing surfaces or set in new concrete.

Simply locking into a sleeve with a padlock, the bollard is easy to use.

Have the convenience of being able to utilise these bollards when you need to protect your assets and then remove them to provide clear access and availability to the area when required. Absolute flexibility!

Our Safety Xpress 140mm Removable Bollard is the added security that you need.
