Events, constructions site, offices, conference, festivals and more!

Installation:

1. Measure the area you need to apply these Cable Protectors first, work out how many modules you need
2. Clip modules together to form required length
3. Open top lids to run cabling through, make sure cabling are within sizes this product can accommodate.
4. Check all cabling are laid out flat before closing top lid.
5. Check to see if **all lids are clipped in / fully closed** before allowing traffic to pass.
